Production	610	20	NSD	NSD
Transportation and material moving	580	160	NSD	NSD
Military specific	NSD	NSD	NSD	NSD

These data do not reflect the relative FTEs worked by the various groups of employees.

Data is based on a sample of employers responding to the Survey of Occupational Injuries and Illnesses, and weighted by employer size and industry. The scientifically selected probability sample used was one of many possible samples, each of which could have produced different estimates. The sample excludes farms with fewer than 11 employees.

Days-away-from-work cases include those that result in days away from work with or without job transfer or restriction.

Data for employers in railroad transportation are provided to BLS by the Federal Railroad Administration, U.S. Department of Transportation.

Race and ethnicity data do not add to total. Some cases may be counted as both "Multi-race" and "Hispanic and other" race.

NSD: Non-sufficient data: these data do not meet publication guidelines.

Because of rounding and data exclusion of nonclassifiable responses, data may not sum to the totals.

Data Source: Survey of Occupational Injuries and Illnesses, Bureau of Labor Statistics, U.S. Department of Labor, August 30, 2012
